

Daniel Canter, M.D.
Georgia Urology

Dr. Canter, is a board-certified, fellowship-trained urologist specializing in treating patients with urologic cancers. Dr. Canter leads the Advanced Prostate Cancer team at Georgia Urology, a specific group of urologist experts designed to help patients treat advanced prostate cancer. He also leads Georgia Urology's clinical research efforts.

“Working as a urologic oncologist requires a great mix of medical and surgical subspecialty,” Dr. Canter says. “In addition, most of my patients are longitudinal, and our treatment relationship is over the long haul.”

Dr. Canter received his medical degree from George Washington University School of Medicine, graduating as the valedictorian. He completed his residency in urology from the University of Pennsylvania. Following this, Dr. Canter pursued specialized fellowship training in urologic oncology at the Fox Chase Cancer Center.
