GENERAL INFORMATION

COURSE DESCRIPTION

This live symposium will explore the current treatment paradigms for the multi-disciplinary treatment of Head and Neck Cancer (HNCA). Recent data on this topic will be covered to apprise the audience of these rapidly evolving findings, and expert faculty will instruct participants on the optimal applications of these data through a series of panel discussions, case presentations and audience response input.

TARGET AUDIENCE

This activity is intended for medical oncologists, radiation oncologists, surgical oncologists, dentists, physician assistants and nurse practitioners who provide medical care for patients with head and neck cancer.

CONTINUING EDUCATION CREDIT

The Emory University School of Medicine designates this live activity for a maximum of 6.5 *AMA PRA Category 1 Credits*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 6.5 MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

The Emory University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

ADDITIONAL INFORMATION

Please contact Shelby Smith, 404-727-1626, shelby.smith@emory.edu or the Emory CME Office 404-727-5695 with any questions.

LEARNING OBJECTIVES

Upon completion of this education activity, learners should be able to:

- Select optimal therapy for locally advanced HNCA based on current recommendations and recent data on the role of immunotherapy.
- Apply best practices when integrating immunotherapy in the surgical management of patients with HNCA.
- Incorporate recent data from trials evaluating genomic data in the management of Head and Neck Cancer.
- Employ current treatment guidelines and best practices in the use of trans-oral robotic surgery in HPV related disease.
- Understand the multi-modal management of Sino-nasal cancers.
- Learn about best practices in incorporating radiation for treating HPV related OPCA.
- Get an overview of the challenges and benefits of establishing a multi-disciplinary HNCA clinic.
- Learn about the appropriate use of immunotherapy in the management of recurrent or metastatic HNCA.
- Learn about the management of saliva gland cancers.
- Learn about the standard dental evaluation as well as speech and swallow evaluation of patients undergoing multi-modal therapy.
- Employ recent data and current treatment guidelines in the management of premalignant oral lesions.
